eCampusOntario Infrastructure for Open Publishing of Learning Resources

Dr. Wendy Freeman, Director, Office of E-Learning, Ryerson University
Project Objective

Build a prototype open publishing infrastructure to integrate and extend the BC Open Textbook Library that will be migrated from BCcampus to eCampusOntario in May 2017 with a project completion date of Aug. 31, 2017.
Housekeeping

• Washrooms are by the elevators
• Meeting materials posted library.ryerson.ca/open/events
• Hashtag for the day is #OERUXday
• Wireless network: SSID RU-Secure.
  • Username: oerusability
  • Password: Usability@Ryerson1@!
Agenda

10:45 a.m. Coffee Break
11:00 a.m. Demo and Prototype Overview
   Dean Irvine - Architectural Overview, Apurva Ashok - Pressbooks Demo
11:45 a.m. Q&A - All
12:00 p.m. - 1:00 p.m. Lunch
1:00 - 2:30 p.m. Breakout sessions - Rotating sessions at 1:00, 1:30, 2:00 p.m.
   User Front-End (Agile) - Room #SLC508
   Pressbooks Authoring Platform - Room #SLC515
   OER Module Creator (Lars and DES) - Room #SLC516
   Repository/Metadata - Room #SLC508
2:30-2:45 p.m. - Coffee Break
2:45 p.m. - 3:45 p.m. - End of day reporting
   Reports from each of the groups
3:45 p.m. Concluding remarks
Project deliverables

Deliverable 1: A working Pressbook prototype with enhanced features

Deliverable 2: Integrate an open source repository

Deliverable 3: Community building and knowledge mobilization

Deliverable 4: Learning module authoring and distribution prototyping
Key Deliverable Workstreams

The four core activity streams are:

- Pressbook prototype with enhanced features
- Integrate an open source repository that will support the open textbook platform and other content
- Community building and knowledge mobilization
- Learning module authoring and distribution prototyping
Key Deliverable Workstreams

Project leadership and governance structure:

- Ann Ludbrook, Copyright Librarian, Ryerson
  Communications & Community Building Chair

- Hongbo He, Director, Applications Services, CCS, Ryerson
  Infrastructure Chair

- Hugh McGuire, Co-Founder, Rebus
  Pressbooks Chair

- Naza Djafarova, Director, Digital Educational Strategies,
  Chang School
  Learning Module Authoring Chair
Major Milestones

**April**
- Project Blog/Twitter Launched, UXD RFQ issued
- Congress Event Staged (May 30)
- Staged, Learning Module
- Environmental Scan Completed, OpenTextbook, OER Sprint

**May**
- Workgroups Formed, Governance and Leadership Approved, Schedule and Workflow Formulated
- UXD Designer Selected, Onboarded,

**June**
- Design Thinking Sprint, Usability Lab, Library OER Hackathon
- Final Project Testing, Delivery

**July**
- Scholar’s Portal, OCLS, University of Waterloo
- Consultative Discussions
- AODA Consultation Conducted, Metadata Approach Formulated

**August**
- Funded by Ryerson University
- Funded by ecampus Ontario
Timeline

- April: Research, Consultation
- May: Development
- June: Testing
- July: Prototype completion, Learning Module report, Final Report
- August: Testing
- September: Communications & Community Building
- October: Final Report
- November: Final Report
Project in Numbers

Meetings: 30+
Meeting Hours: 60+
Project Hours: 1,375+
Team Members: 30+
Our Partners
Infrastructure Workgroup Tasks

Integrate an open source repository that will support the open textbook platform and other content

- Evaluate available open source repository systems and consult with BCcampus and other Canadian institutions regarding their OER repositories
- Install, configure and customize the functions of the selected repository system to meet the requirements of open textbooks and other types of OER content
- Develop a customized/branded design for an eCampusOntario open textbook library
- Investigate and integrate a Single Sign On (SSO) authentication system (e.g. CAS and Shibboleth) for the selected repository system
- Integrate the selected repository system with Pressbooks
- Extend repository to support possible identified requirements that are not supported out of box
DSpace

- Open Source (BSD License)
- Used by 1,000 + organizations (education, government and private)
- Open Standards: OAI-PMH, OAI-ORE, SWORD, WebDAV, OpenSearch, OpenURL, RSS, ATOM
- digital content types supported: PDF, Word, JPEG, MPEG, TIFF and many more. Easy to extend.
Recent Updates

- Launch and ongoing testing of a DSpace instance,
- Active work on testing content uploads using sample open textbooks received from the Library
- Collaboration with Library metadata experts to explore standards to inform DSpace schema approach
- Collaboration and code sprint with BCcampus OpenEd team
- Collaboration with Rebus on integrating DSpace with Pressbook
- Collaboration with Agile on integrating DSpace with the OpenTextBook Wordpress plugin
A collaboration network.

Agile Humanities Agency

Make it agile, by design.

Agile Networks
Our agency forms “agile networks” among clients and rapidly assembled teams of programmers, designers, consultants, and project managers. These agile configurations change from job to job.

Collaborative Consultation
We have a successful track record in seeing projects through all stages of development – from preliminary consulting and grant applications to project management and sustainability.

Open-source Innovation
We specialize in open-source development, design themes and platforms, create custom modules, tools, and plugins, and recirculate our code through our public GitHub repository.
Learning Modules Workgroup Tasks

Complete an environmental scan of existing open source learning module authoring systems
Consult with learning design and faculty support communities in Ontario (OUCEL and College Technology Support)
Draft specifications for a learning module authoring and repository system to include:
  ● Exploration of common format for distribution. Module distribution outline and requirements
  ● Integration and introduction of ID workflow within authoring tool
  ● Making common learning objects available within the authoring process
  ● Design and create conceptual prototype
Recent Updates

- Research into different systems as part of an extensive environmental scan
- Discussions of SMART workflow functionality, which would support an instructional design (ID) workflow
- Survey of multiple methodologies to support course authoring
- Reviews of standards and innovative ways of content digestion and distribution
- Outreach to OER thought leaders
- Consultation with University of Waterloo
Our Goal

Conceptualize a new generation of software that will fill existing gaps in authoring tools for high quality open educational resources
Our Approach

1. Perform environmental scan
2. Consult with community and experts
3. Analyze collected data
4. Conceptualize solution
5. Design prototype
Environmental Scan

● Methods
  ○ Review standalone module builders
  ○ Review integrated content creation tools (CMS, LCMS, OER repositories tools, DAM, etc.)
  ○ Review automated instructional design systems

● Key Findings
  ○ Overall gaps of interoperability, personalization, analytics, advising, instructional design and learning assessment, collaboration, and accessibility and universal design.
Consultations with Community and Experts

● Methods
  ○ Two surveys: 68 novice and 71 expert users
  ○ One-on-one consultations with leading experts (C. Reigeluth, C. Bonk, S. Mishra, D.Wiley, R. Jhangiani)

● Key Findings
  ○ Need for onboarding instructions / tutorials
  ○ Great need for instructional design support
  ○ Strong desire for easy collaboration / co-authoring tools
  ○ Quality of OERs is important
Conceptualize Solution: Main Features

- **Onboarding and technical support**
  - Intelligent assistance (detect experienced difficulties, provide contextual advice)
  - AI-powered chatbot

- **Automated instructional design**
  - Instructional design templates
  - Learning objective alignment
  - Intelligent personal advisor (based on machine learning algorithms)
  - Automated ID reviews and feedback

- **Collaborative workflow (co-authoring, commenting, reviews)**
Conceptualize Solution: Main Features (cont’d)

- Interoperability with other systems
  - Search and use OERs from other repositories
  - Integrate created modules into other systems
- Easily adaptable content
- Accessibility and universal design
  - Automated review and suggestions
- Responsive interface and content
Assumptions

● Single login
  ○ Module Builder is only available to users logged in to OER Repository
  ○ Module Builder does not require separate credentials

● Managing OERs
  ○ Save selected OERs to personal collections/folders
  ○ Upload user’s own files (images, documents, media, etc.) to personal collections
  ○ Modify/remix existing OERs

● Interactive learning objects
  ○ LOs are separate OER resources, not part of Module Builder
  ○ Can be created/modified using builtin editors (separate editor for each LO type)
  ○ LOs are created as personal assets: need to be published to become public OERs
Module Editor Workflow

1. Setup Module
   - Add metadata
   - Add learning objectives
   - Select ID template

2. Build Content
   - Create HTML content
   - Add items from repository
   - Create assessments
   - Arrange all assets in sequence

3. Customize Presentation
   - Select presentation template
   - Change colours
   - Add branding

4. Publish / Share
   - Publish to repository
   - Export as document, ebook, Tin Can API or IMS Common Cartridge
   - Get direct link or embedding code

The Chang School of Continuing Education

Ryerson University
Limitations

- Metadata standard for OERs is not defined
  - Crucial for successful adoption of OERs
  - Required for search and integration with other repositories

- Interoperability
  - Adopting OERs from other systems
  - Single search across multiple repositories
Summary

- Environmental scan and consultations demonstrated strong need for technical and instructional design support
- There is a great interest in collaboration, but finding co-authors should be made easier
- Establishing metadata standards for all OER repositories is crucial for successful adoption of OERs
- Interactive learning activities should be treated as separate objects. Repository should provide separate builders/editors for each type of LO
Communications Workgroup Tasks

Engaging in ongoing promotion, information sharing and leadership activities across Ontario to support Open Education Resources (OER) skill-building and development

- Speaking at post-secondary events dedicated to open learning content development
- OER working teams and experts actively engaged in community- and foundation-building activities across the higher education community.
- Consult with representation from OCUL, OUCEL, OCLS, University of Waterloo, and Queen’s University
- Consultation with upcoming OER and Library association meetings to include focus groups
- Establish opportunities to receive iterative feedback from representative community partners through existing grassroots communities.
Recent Updates

- Establishment of a Project Blog
- Congress 2017 OER Promotional/Community Event on May 30
- Creation of a Poster Presentation
- Launch of a Twitter channel
- OER Librarian listserv
- Consultation session with Scholar’s Portal and OCLS
- Creation of an event banner and supporting collateral
- Ongoing news and blog posts
Ryerson University hosted an OER event at Canada’s largest gathering of scholars, Congress 2017 hosting 9,000 academics, researchers and policy-makers.
Open Publishing Infrastructure Project at Ryerson

About The Project
This summer, eCampusOntario and Ryerson University will be spearheading an open publishing infrastructure project designed to enhance and expand eCampusOntario’s planned Open Textbook Library.

This library, developed and shared by BCcampus, will provide access to over 180 high-quality, academically reviewed textbooks and open education resources (OER) for Ontario post-secondary students.

Wendy Freeman: Project Lead
“Ryerson University is proud of its continued and ongoing work and collaboration with eCampusOntario. Ryerson is deeply committed to and passionate about the ability to provide world-class open educational materials and resources to Ontario post-secondary learners to lower the barriers to access and empower localization by instructors.”

Dr. Wendy Freeman, Director, Office of E-Learning, at Ryerson University.

Four Key Project Workstreams
- A working Pressbook prototype with enhanced features
- Integrate an open source repository that will support the open textbook platform and other content
- Community building and knowledge mobilization
- Learning module authoring and distribution prototyping

Book Oven Partnership
The creation of a technology platform based on Pressbooks, an industry-standard book writing solution.

Pressbooks is simple book production software which exports into all the file formats you need to publish your books:
- MOBI format (for Kindle ebooks)
- EPUB format (for all other ebookstores)
- designed PDF (the “interior book file” for print-on-demand)
- more exotic XML formats

Pressbooks is used by authors, publishers and educational institutions around the world.

Ryerson Partnerships and Advisors
A cross-functional working group at Ryerson University will be driving a prototype infrastructure to support the Open Textbook Repository. The Ryerson team includes:
- E-Learning Office
- Ryerson University Library & Archives
- Chang School, Digital Education Strategies (DES)
- Computing and Communications Services (CCS)
- Learning and Teaching Office (LTO)

The Ryerson team is supported by several key advisory partners:
- Ontario Council of University Libraries (OCUL)
- Ontario College Library Service (OCLS)
- University of Waterloo
- Queen’s University

Community Building
Ryerson University is engaging in ongoing promotion, information sharing and leadership activities across Ontario to support Open Education Resources (OER) community building, knowledge mobilization, skill-building and development.

This will also include the Sprint model, where project members and OER community members can gather together and work on open educational resource creation and training.

Future Events

- OER Sprint Toolkit
- Late September Ontario-wide Librarian Sprint Day
- Open Access Week event
- Funding for OpenCon conference
- OLA Superconference Panel
Pressbooks Workgroup Tasks

Design
The overall design will be focused on branding a Pressbooks Textbook Creation and Editing system available to eCampusOntario members, and improving the overall design of the system. Specific tasks will include:

● Developing and implementing a customized/branded design for an eCampusOntario Open Textbook authoring system
● Improvements to the Open Textbook catalog design and implementation
● Improvements to standard Pressbooks web-based “book” interface
● Custom template (web, pdf, epub/mobi) for eCampusOntario
Pressbooks Workgroup Tasks

Implement WordPress core REST API

- This project will expose any openly licensed Pressbooks book (on any network) to the core REST API, meaning (among other things) that all content (metadata, books, chapters, images etc) can be queried.
- The REST API would also allow other applications to build on Pressbooks, and collections of Pressbooks books.
- **Status**: V2 API complete.
Pressbooks Workgroup Tasks

Submission to DSPACE repository

- We are building a system to allow a Pressbooks book to be submitted to a DSPACE repository
- We are using the SWORD repository submission protocol
- **Status:** prototype repository submission is complete.
Pressbooks Workgroup Tasks

Cloning of books & collections

- Building on the API work, we are developing a system to easily “clone” a complete Pressbooks book
- This will allow any user to copy any openly licensed Pressbooks book (including all content, media etc) into a new version, to allow revision, remixing etc.
- This significantly improves on the export-import method currently used.

**Status:**

- V1 cloning is almost complete, allowing cloning within a Pressbooks network.
- V2 will include ability to clone from any Pressbooks network.
- V3 (probably out of scope) will include the ability to clone an entire collection
Pressbooks Workgroup Tasks

AODA Compliance & Improvement
This project will ensure AODA compliance (for users/authors, and readers) of the OpenTextbook Editing and Creation system. This work will be done in collaboration with OCADU’s Inclusive Design Research Center (IDRC). The project will include:

- An audit of the system (for authors and readers)
- Remediation, where necessary, of any problems identified
- Integration of the OCADU / FLOE User Preference Toolbar by default
Pressbooks Workgroup Tasks

Follow-on Project Recommendations
This project will provide recommendations for next steps, and follow-on improvements, including, but not limited to, scoping and budgeting for:

- Development of proposals for mechanisms to offer any eCampusOntario member institution a dedicated, branded Pressbooks instance (co-branded with eCampusOntario)
- Improved support for annotation
- Integration with LTI/LMS systems
- Enabling single sign-on / user authentication
- Improvements in collaboration functions
- Improvements in EPUB3 import/export & round-tripping
- Publishing source code to open source software community
- eCampusOntario role in supporting OER development, adoption and support in Ontario
A creative agency for meaningful digital projects.

Founded in 1998, we design the highest quality responsive websites and mobile apps.

Osheaga
Stellar performance - onstage and online
Thank you
Agenda

BREAK - Caffeinate

11:00 a.m.

Demo and Prototype Overview
  • Architectural Overview
    Dean Irvine, Agile Humanities
  • Pressbooks Demo
    Apurva Ashok, Pressbooks
  • Q&A - All

12:00 p.m. - 1:00 p.m. Lunch
1:00 - 2:30 p.m. Breakout sessions - Rotating sessions at 1:10, 1:50, 2:10 p.m.
User Front-End (Agile) - Room #SLC508
Pressbooks Authoring Platform - Room #SLC515
OER Module Creator (Lars and DES) - Room #SLC516
Repository/Metadata - Room #SLC508
2:30-2:45 p.m. - Coffee Break
2:45 p.m. - 3:45 p.m. - End of day reporting
Reports from each of the groups
3:45 p.m. Concluding remarks - Dr. Wendy Freeman
Afternoon Preview

1:00 - 2:30 p.m.

Rotating Breakout sessions
   1:00 | 1:30 | 2:00

User Front-End (Agile) - Room #SLC508

Pressbooks Authoring Platform - Room #SLC515

OER Module Creator (Lars and DES) - Room #SLC516

Repository/Metadata - Room #SLC508

2:30 p.m.
Refresh

2:45 p.m. - 3:45 p.m.
Reports from each of the groups

3:45 p.m.
Concluding remarks
Housekeeping

- Washrooms are by the elevators
- Hashtag for the day is #OERUXday
- Wireless network: SSID RU-Secure.
  - Username: oerusability
  - Password: Usability@Ryerson1@!
Project Planning

Meetings & Events

- Minutes and bi-weekly updates
- Bi-Weekly Web Posts
- Product Schedule
- Google Drive
- Weekly Workgroup
- Team Building (Launch, midpoint, close)
- Chair Committee (Bi-weekly)
- Trouble-shooting Sessions (as needed)

Final Reporting

- Key Decision Log
- Schedules & Activities Log
- Technical Documentation
- Lessons Learned

Toolkit

- Project Charters
- E-mail Distribution Lists
- Meeting Support Templates
- Project Briefs & FAQs
